

## ADMIN SIDE:

### Pages:

- Admin Home Page
- Individual Project Pages
- Student Overview Page
- Individual Student Page

### Admin Home Page:

#### **FEATURE: Project Overview Boxes:**

Each *Project Overview Box* will include the following features and information:

- Number of Billed vs. Unbilled Hours (Color Coded)
- Total Cost/Resources Spend on Project
- Checkbox representing billed in cider.
- Students assigned to this project.
- Button to View the Full Project Page
- TBD

#### **Billing Section:**

This section will include a grid of *Project Overview Boxes* that have **not been billed in Cider** yet.

- The *Project Overview Boxes* will contain a checkbox, that when checked, the Box for that respective project will be removed from the *Billing Section* and will only be in the *All Projects Section*.
  - Checking this box resets adds the unbilled hours to the billed hours and resets the unbilled hours to 0.
  - There will be an “Are You Sure?” pop up when trying to check off *billed* box.
- When a student logs hours to a project that has 0 unbilled hours, the respective *Project Box* is moved backed to the *Billing Section* and will have more unbilled hours.
- We will store the history of all billing information for a project on the project’s respective *Project Page*.

### **All Projects Section:**

There will be an accordion option for viewing all projects, both finished and ongoing.

The format of this section will be a grid of the *Project Overview Boxes* and will have the following additional features:

- This section will contain an option to filter with the following options:
  - Ongoing Project
  - Completed/Finished Project
  - Unbilled Hours Remaining
  - *Overbudget??*
  - *Department??*
  - TBD
- A button to view this section as one whole page ***possibly??***

### **Student/Worker Overview Section:**

This will be a section that includes information that the admin needs to see regarding the student workers.

This section will contain the following features and options:

- A grid view of all *current* workers.
  - Includes the number of hours inputted by them for that pay period.
  - Current projects they are assigned to.
  - Button to view the full page for that respective student.
- A link to view all student workers in full page.

### **Admin All Projects Page:**

There will be an accordion option for viewing all projects, both finished and ongoing.

The format of this section will be a grid of the *Project Overview Boxes* and will have the following additional features:

- This section will contain an option to filter with the following options:
  - Ongoing Project
  - Completed/Finished Project
  - Unbilled Hours Remaining

- *Overbudget??*
- *Department??*
- Student
- Option to Add a New Project.
- Option to Change the status of a project from *ongoing* to *finished*.

### **Admin All Student/Workers Page:**

This will be a section that includes information that the admin needs to see regarding the student workers.

This section will contain the following features and options:

- A grid view of all *current* workers.
  - Includes the number of hours inputted by them for that pay period.
  - Current projects they are assigned to.
  - Button to view the full page for that respective student.
- Option to filter based on the following inputs:
  - Currently still working for I3/DXG
  - No longer working for I3/DXG
  - Projects
  - TBD
- Add a new student/worker.
- Set student worker to *no longer working*.

### **Individual Student/Worker Overview Page:**

This page contains information regarding one individual student worker.

This page will include the following sections and features:

- Number of Total Hours Billed and Unbilled
- Currently assigned projects.
- Previously assigned projects.
- Option to assign or remove a current project from that student.
- That student's logged hours & comments for that pay period.
- Various analytics things.... TBD.

## USER SIDE:

Pages:

- User Home Page
- Log Hours Page
- User History?

### User Home Page:

Contains all relevant links and information that the user needs to log their hours and working history.

This page will contain the following features and sections:

- A button that links to the log hours page.
- A section for viewing all currently assigned projects.
- A section for viewing recently logged hours.
  - Links to page of full history?

### User Home Page:

This page will allow users to log their hours by filling out a form and adding their input into the database.

This page will contain the following features and options:

- A form where users can input their worked hours; contains the following inputs:
  - Project Name (Drop Down Menu of Assigned Projects)
  - Date
  - Start Time
  - Stop Time
  - Work Description
  - Submit Button
- After the form is submitted it sends them back to the user dashboard.
